MOTORCYCLE CLUTCH OPTIONS

CK/CKF Series Clutch Kits

CK complete engine sets of stack height controlled friction plates feature the EBC Brakes' unique alloy particle impregnated clutch facings that prevent burn up or slippage. CKF carbon fiber impregnated kits for ATV and moto-x use are built to last longer, grip and feel better than cork kits.

These pads bed in fast and deliver extremely high friction linear performance in track use. GPFAX pads are high friction but highly stable in stop. This means pads are powerful and predictable time after time when the brake is applied in race use. The “in-stop” friction fall off is almost zero and can hardly be noticed at the lever, meaning the brakes offer superb control. The EBC dyno is set to duplicate race conditions at the Road America race track and represents a true simulation of race brake demand. The number of race teams using GPFAX grows annually and for 2022 the exact same formulation developed through 2019 is used again.

EBC pads are developed in our own laboratory and tested using this race track simulator dynamometer to guarantee perfection before being thoroughly field tested on dozens of race teams.

BRAKE LINES

EBC Brakes braided brake lines are manufactured in Great Britain from the highest quality materials, with braided stainless steel PTFE hose and grade 303 stainless steel precision machined fittings. At EBC Brakes we do not use mild steel or aluminum components in our brake lines, instead we choose stainless steel for every fitting, as this material offers maximum quality in terms of strength and corrosion resistance. EBC brake line kits are supplied 100% complete and include brand new stainless steel bolts for maximum visuals.

EBC Brakes braided hoses fit many bikes in front, rear and race designs. Braided hoses improve brake pressure transfer to the caliper and disc pads, they help improve lever feel and reduce “bulging” which may happen with standard rubber hoses. Braided hoses are also more resistant to abrasion or cuts common with off road riding and thereby improve safety.

EBC brake lines are designed and built to last, that’s why every line is offered with a lifetime warranty. Every individual line is pressure tested after assembly and as an absolute guarantee of quality, EBC brake lines are manufactured to Federal Motor Vehicle Safety Standards (FMVSS-106) and have the following approvals: DOT, TÜV, ISO9001, DEKRA, ARAI, CQC AND ADR.

DOT MIT ABE TÜV Approved KBA 61169 ISO9001 DEKRA ARAI CQC ADR

BLM is our standard braided hose series whereas BLMR series race hoses have fewer lines and are the choice for track and performance use giving an even firmer lever feel and improving service time. Racing kits take the shortest route from the master cylinder to the caliper. The lines usually bypass any Y-splitters in the existing system, this reduces the number of places where the brakes can leak. The two lines from the master cylinder are a lot easier to bleed than a system with a Y piece as each line bleeds independent of the other whereas with a Y piece they don’t until fluid is below the Y piece.

Hose numbers are suffixed with a number and letter designating the number of hoses in the kits and front or rear, for example;

BLM6038-1F is a kit with a single hose for front fitment
BLM8111-3F is a kit with three hoses for front fitment
BLM8113-1R is a kit with a single hose for rear fitment
BLMR8114-2F is a race kit with two hoses for front fitment.

We do not sell BLMR race hoses for rear fitments, only front.

Some kits are sold as complete bike sets only and examples of numbering are:
BLM8169-4FR which is a four hose kit for a complete bike (front and rear).

All motorcycle brake lines (except Harley) are supplied with black stainless fittings, clear hose and red/blue EBC Brakes heat shrink.

HARLEY-DAVIDSON® BRAKE LINES
EBC Harley-Davidson® lines are supplied in a unique finish, with chromed stainless fittings, black hose and black/space-grey EBC Brakes heat shrink.
Additionally, where many competitors use ‘off the shelf’ components, EBC Harley-Davidson® lines are manufactured using our own bespoke design of chrome plated hardware and brackets, ensuring perfect fitment for complex Harley-Davidson® brake line assemblies.

MOTOCROSS AND OFF-ROAD BRAKE LINES
EBC Brakes motocross and off-road brake lines are supplied with a hardened plastic sheath around the lower portion of the hose, to provide additional protection against damage which could otherwise result from the harsh and unforgiving conditions of off-road terrain. These brake lines are built to withstand a lifetime of off-road abuse, ensuring high performance and safe riding for the lifetime of the vehicle.

Making Precision Pilot Jets

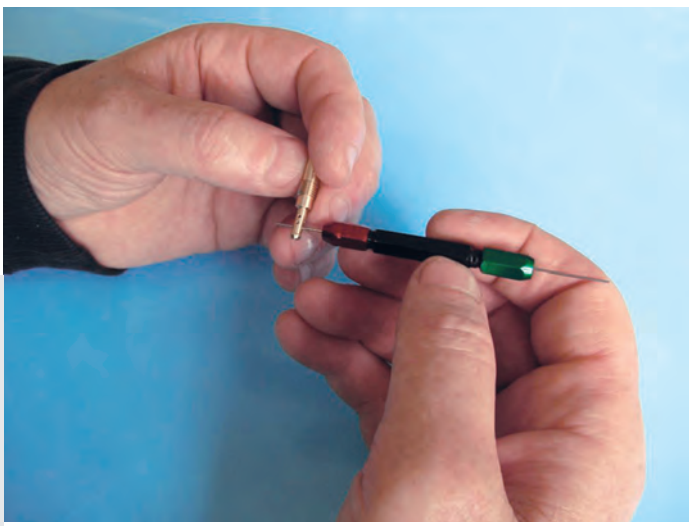

Everyone knows how sensitive an engine is to pilot jets in the acceleration stages from 1000 to 3500 rpm and getting fuel mixture right in this area is critical. For this reason jets have to be perfectly accurate in their marked size and incremental size steps. EBC Brakes' sister company A-BAX Precision Engineering Ltd in the UK has purchased the most accurate machine on the planet for this work shown below. A-BAX Precision Engineering Ltd pilot jets are precise, clearly marked and reliably gauged using pin gauges, accurate to one tenth of a thousandth of an inch, you can rely on their accuracy.
