BRAKES

AMERICAN-BUILT MACHINES
THE WORLD'S LARGEST RANGE OF PREMIUM
REPLACEMENT MOTORCYCLE BRAKES

Brake pads, rotors, braided stainless brake lines, clutches and much more, with four manufacturing plants in the UK and USA producing over 10 million components each year.

www.ebcbrakes.com

MOTORCYCLE BRAKE PADS

FA-Series – Aramid Fiber Organic

- Organic pad with zero metallic content
- Good fingertip feel at the lever
- Low noise
- Easy on rotors
- Medium lifetime pad
- British made

V-Series

- Superb “semi sintered “replacement pad for heavier bikes top - selling grade
- Zero metallic but some copper content for longer life
- Zero rotor damage or noise
- Lifetime almost as good as sintered
- British Made

Double-H™

- USA made in our Ohio plant
- Sintered copper alloy construction
- Superb high brake effect pad outlasting just about everything
- Great pad for heavier touring bikes and sport use
- Zero rotor galling

EPFA-series

- USA made in our Ohio plant
- High spec Sintered copper alloy construction
- Strongest brake feel
- Zero rotor galling
- Higher heat tolerance for heaviest duty street riding

GPFA-Series

- USA made in our Ohio plant
- Higher spec track use formulation
- Sintered copper alloy construction
- Not recommended for street riding due to very high friction level

WELCOME TO THE EBC 2025 USA-BUILT MOTORCYCLE CATALOG

The world's largest selection of brakes for USA-built motorcycles including our USA-manufactured, sintered pad ranges and UK-made organic and semi-sintered Vee-pads plus a full range and selection of custom replacement brake rotors.

HOW TO USE THIS CATALOG

Pads are simple; simply look up the machine and select the pad type that's best for your customer. On rotors there are sometimes too many choices to list in columns so we use a group number in those cases and you simply take the group number, look at the illustrations and select the one you prefer; solid, floating or oversize.

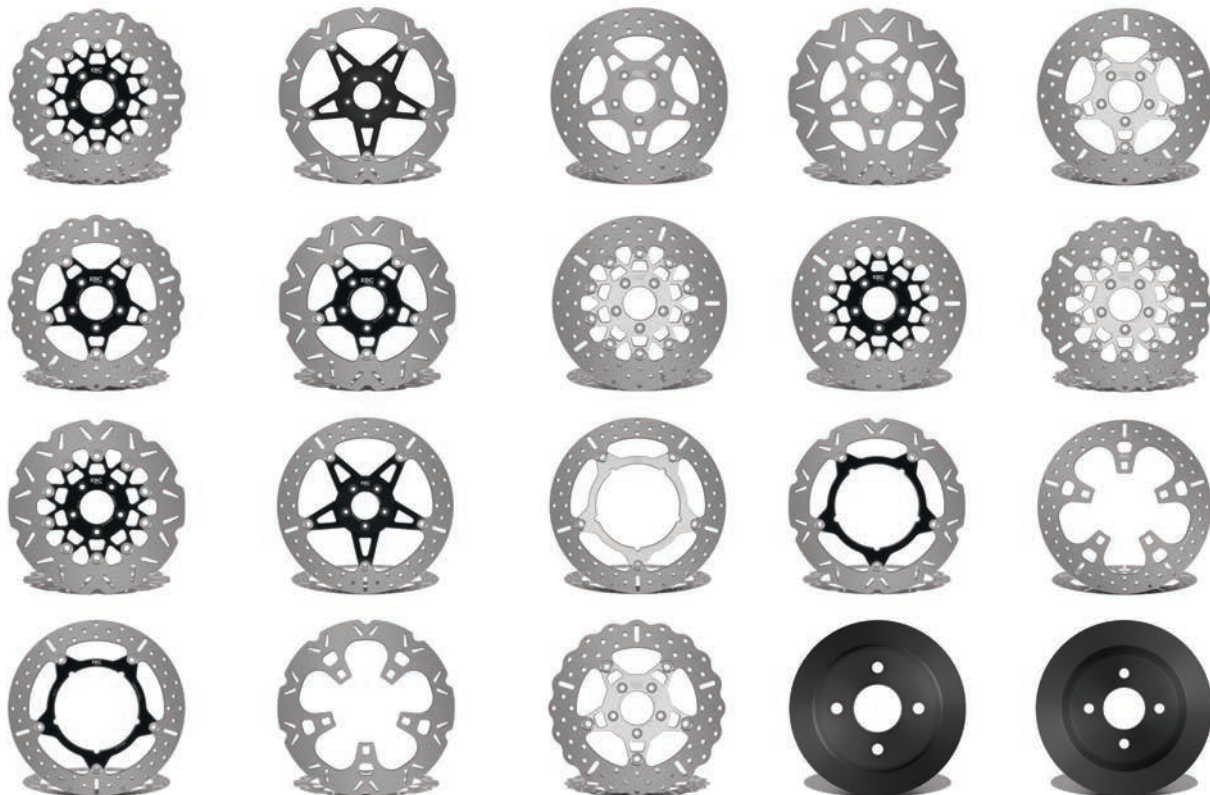

EBC make different compounds for most calipers and as a guide. FA is the premium Organic grade, X pads are a dry conditions off road pad, V pads are our long lasting semi sintered pad for street use. R pads are a long lasting off road compound, HH is our USA made sintered metal highest brake effect pad, EPFA is our premium Sintered pad, also USA made with super quiet braking and highest temperature capabilities.

KEY TO SYMBOLS

- ⊕ This rotor is made of billet steel and should only be used with EBC FA Organic or Vee Pads.
- * Two sets of brake pads are required for this fitment.
- ▲ Pads sold in axle sets – 4 pads per set.

FULLY FLOATING

OVERSIZE FRONT ROTORS FOR HARLEY-DAVIDSON® RANGE PAGE 34/39/42

**TRIKE ROTORS IN CAST IRON
SEE PAGE 45**

STAINLESS STEEL SLIDER SHIMS

Stainless steel slider shims are fitted to most of the Hayes rear calipers on Harley Davidson® to prevent wear of the machined aluminum caliper “vee” slider faces and new parts are provided with EBC pads. The important things to note are:

After install, the pads must slide freely within the caliper without dragging and here is the basic procedure to install which is to be read and considered along with your vehicle owners' manual content.

If your bike had NO shims at pad change, do not try to fit shims that needs forcing into the caliper or would render the pads tight or locked UNLESS the pads were loose and rattling (indicating that at a previous service the bike owner or service technician may have forgotten to install shims when they were needed).

Clean up the aluminium slider faces carefully removing all corrosion and scale. Use a fine file or a file wrapped in abrasive paper and remember you are only cleaning off corrosion and scale.

Lightly lube the slider with high temp EBC caliper grease or similar, taking care not to contaminate pads with grease or greasy fingers. Grease on pads renders them ineffective.

Install the stainless slider shims.

Clean off any paint or burrs in the ears of the pads with a fine file and slip them onto the slider shims. The pads should be a light push fit with thumbs and if you have to force them you have either left scale or corrosion under the shims, the ears of the pad have paint or burrs in them or your caliper model did NOT need shims. Never force or hammer the pads into the caliper.

If you have any doubts contact a qualified service technician.

After brake install, raise the bike wheel and rotate the wheel, pumping and releasing the brakes to check for free spinning of the wheel and free releasing of the brakes. Test ride vehicle carefully applying the brakes intermittently for a few miles to evaluate brake drag and brake release. If rotors become blued or hot spotted or seem in anyway to be overheating, see a qualified technician. Do not ride the bike with dragging brakes.

TECH TIPS

MOST EBC PADS are not designed to re-use any original **BACKING SHIMS**. See pad diagrams for guidance on where shims may be refitted without causing problems, but even then, always check caliper mounts easily over the rotor and has a few thousandths of free float, and is not tight or causing drag, rotate wheels and operate brakes a few times with wheel lifted to check for free brake and no drag.

EBC front pads, reference FA94 are supplied with a larger (stronger) retainer screw, this has a different thread to the original parts and this screw should only be used with the EBC product.

Always caution the vehicle user/owner to check pad wear every month visually or after 3000 miles of riding, and replace pads when 1/16" of material left on backing plates. Running pads below this level is dangerous.

Many US built motorcycles use **SILICONE BRAKE FLUID**, always check carefully in the owners manual as to which fluid is required, never mix silicone fluids with glycols as this will cause sludging and ineffective brakes.

No EBC pads have ever contained asbestos, but some low cost aftermarket brands you look to replace may have. Therefore, always observe safety procedures when removing old pads and cleaning away dust. Use a wet cloth and dispose of safely after use.

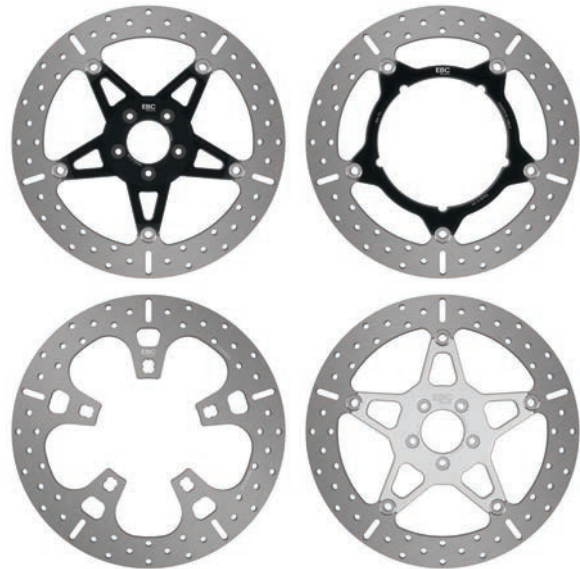

All EBC organic pads now feature the revolutionary **Nucap®** (Canada) **NRS®** hook system. This guarantees the perfection of bond strength on pads. This allows EBC to use even chromed backing plates as the puck itself is retained by strong Velcro-like fingers that protrude about 1/32" into the pad material.

When installing new pads and/or rotors always advise the rider to bed in brakes gently, using progressively stronger braking pressure over the first 300-500 miles, riding the vehicle slowly, and allowing extra braking distance until the brakes feel strong.

OVERSIZE ROTORS

EBC Brakes range of 14" and 15" oversize full floating front rotors come with billet aluminum caliper relocation brackets. Plain rotors with a choice of polished or black chrome hubs are available for all big twins to improve brake performance and brake modulation, increasing stopping power by 25-30%. 15" rotors for single front fitments are made with a 6mm ¼" thick rotor blade.

CALIPER RELOCATION BRACKET

BRAKE FLUID

Now tested to meet Florida EPA requirements. Bottle label shows all specifications of the fluid.

DOT 4

A refined specification polyglycol fluid as fitted to most faster street bikes now produced.

DOT 5

Silicone fluid as used in Harley Davidson Motorcycles and many special High Performance Brake systems.

BF307

Highly refined DOT 4 Brake fluid, ideal for Racing or High Performance Road bikes. Can be used in all systems specifying DOT 4 but **NOT** with (DOT 5) silicone fluids.

TO ORDER USE THESE PART NUMBERS

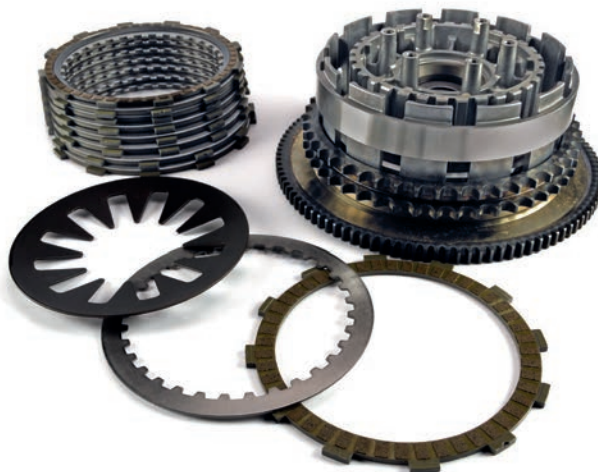

SIX PACK		SINGLE BOTTLES	
DOT 4 (Six Pack)	BF004	DOT 4 (Single)	BF004A
DOT 5 (Six Pack) (Silicone)	BF005	DOT 5 (Single) (Silicone)	BF005A
BF 307 (Six Pack)	BF307	BF 307 (Single)	BF307A

CAUTION: Please check carefully the type of brake fluid used in your system. Adding incorrect fluids could cause major brake failure. DO NOT ever mix glycol fluids (DOT 4 or BF-307) with DOT 5 silicone.

Check your owners manual to see if your system is based on Silicone or Glycol fluid.
Some pre 2005 Harley® models did use Silicone.

CLUTCH KITS AND SPRINGS

EBC Brakes CK friction plate kits contain a complete engine set of stack height controlled friction plates with a unique alloy impregnated clutch facings to prevent burn up and slippage. EBC Brakes SRC series is an aramid fiber lined friction plate set with heavy duty diaphragm springs where required. SRK series includes a full set of friction plates, steel plates and heavy duty diaphragm clutch springs where required. EBC Brakes offer CSK heavy duty clutch coil or diaphragm clutch springs kits where appropriate. EBC Brakes also offer a comprehensive list of clutch holding tools for removal and loosening of the drive shafts bolts and re-tightening a breeze without damaging your expensive clutch basket.

EBC BRAKES JETS

A-BAX Precision Engineering Ltd brass main jets for Keihin CVH carburettors, used on most big twins. Sold in packets of 2 pieces and in dealer assortment kits of 12 sizes (2 pieces each size).

Need more braking power without going oversize

The EBC EPFA range have higher friction and therefore braking power and would be a great first attempt to boost brakes on a machine that lacks braking power at the front end.

Type	Solid	OD	10.24" / 260mm
Color /Finish	Natural	Thickness	0.196" / 5mm
Bobbins	None	Bore	5.315" / 135mm

Fits EBC Pads: 760

BRAKE LINES

EBC Brakes braided brake lines are manufactured in Great Britain from the highest quality materials, with braided stainless steel PTFE hose and grade 303 stainless steel precision machined fittings. At EBC Brakes we do not use mild steel or aluminum components in our brake lines, instead we choose stainless steel for every fitting, as this material offers maximum quality in terms of strength and corrosion resistance. EBC brake line kits are supplied 100% complete and include brand new stainless steel bolts and copper washers for maximum visuals.

EBC Brakes braided hoses fit many bikes in front, rear and race designs. Braided hoses improve brake pressure transfer to the caliper and Rotor pads, they help improve lever feel and reduce “bulging” which may happen with standard rubber hoses. Braided hoses are also more resistant to abrasion or cuts common with off road riding and thereby improve safety.

EBC brake lines are designed and built to last, that’s why every line is offered with a lifetime warranty. Every individual line is pressure tested after assembly and as an absolute guarantee of quality, EBC brake lines are manufactured to Federal Motor Vehicle Safety Standards (FMVSS-106) and have the following approvals: DOT, TÜV, ISO9001, DEKRA, ARAI, CCC AND ADR.

CAUTION – Check hose lengths carefully against parts being replaced and check carefully for pinch points and that hoses are not stretched at full handlebar lock position as this could cause hose leak and brake failure and an accident. EBC hoses are meant to replace standard length hoses and if your customer has changed to different size and shape bars these lines WILL NOT FIT and custom lines must be sourced.

KBA 61169

ISO9001

DEKRA

ARAI

ADR

BLM is our standard braided hose series.

Hose numbers are suffixed with a number and letter designating the number of hoses in the kits and front or rear, for example;

BLM5000-1F is a kit with a single hose for front fitment

BLM5007-3F is a kit with three hoses for front fitment

BLM5002-2R is a kit with two hoses for rear fitment

HARLEY-DAVIDSON® BRAKE LINES

EBC Harley-Davidson® lines are supplied in a unique finish, with chromed stainless fittings, black hose and black/space-grey EBC Brakes heat shrink.

Additionally, where many competitors use ‘off the shelf’ components, EBC Harley-Davidson® lines are manufactured using our own bespoke design of chrome plated hardware and brackets, ensuring perfect fitment for complex Harley-Davidson® brake line assemblies.

EBC BRAKES CLUTCH KITS

SRC/SRK SERIES

The SRC series clutch kits include an aramid fibre lined facing for better heat and wear resistance. Plates should be smeared with drive case oil before install.

The SRK kits include a full set of friction plates lined with a carbon fiber based facing for even higher heat specs and also include new steel separator plates and a set of uprated springs hence a complete rebuild kit. Smear plates with drive case oil before install.

CK/CKF SERIES

These kits are a full engine set, measured to re-set the original "stack" height of the clutch. The plates are a moulded OEM style fiber bonded onto a steel backing. See your owners manual on oil type and install instructions to avoid clutch burn up or slippage.

The upgraded CKF range are again a full OEM size replacement friction plate only clutch pack but use a higher heat resistant carbon fiber impregnated facing. Smear plates with drive case oil before install.

Refer to EBC Brakes Clutch Kits listings for Motorcycle Model and Part No.
Box contents may vary.

Key Guide

CK – Full engine friction plate set similar to OEM (cork based material)

SRC – Full engine aramid fibre lined friction plate set with springs

SRK – Full engine aramid heavy duty friction plate set with steel driven plates and springs

EBC BRAKES CLUTCH KITS

CSK SERIES CLUTCH SPRING KITS

CSK sets include either coil springs or diaphragm springs where appropriate.

COIL SPRINGS

Coil springs are spiral wound with 4 to 10 pieces per set, made from heat treated high carbon steel delivering the right tension for your bike to avoid clutch slip. Springs always get tired after time and can promote clutch slip so when replacing the clutch - always replace the springs.

CSK Spring Kit #	Spring Length # mm	Spring Outer Diameter # mm	Spring Inner Diameter # mm	Quantity per pack
CSK230	47.21	20.04	14.87	4
CSK232	45.31	21.27	15.43	5
CSK233	43.44	20.81	15.51	4

CSK257 -Big Coil	60.99/62.26	66.79/79.87	54.85/67.57	1

DIAPHRAGM SPRINGS

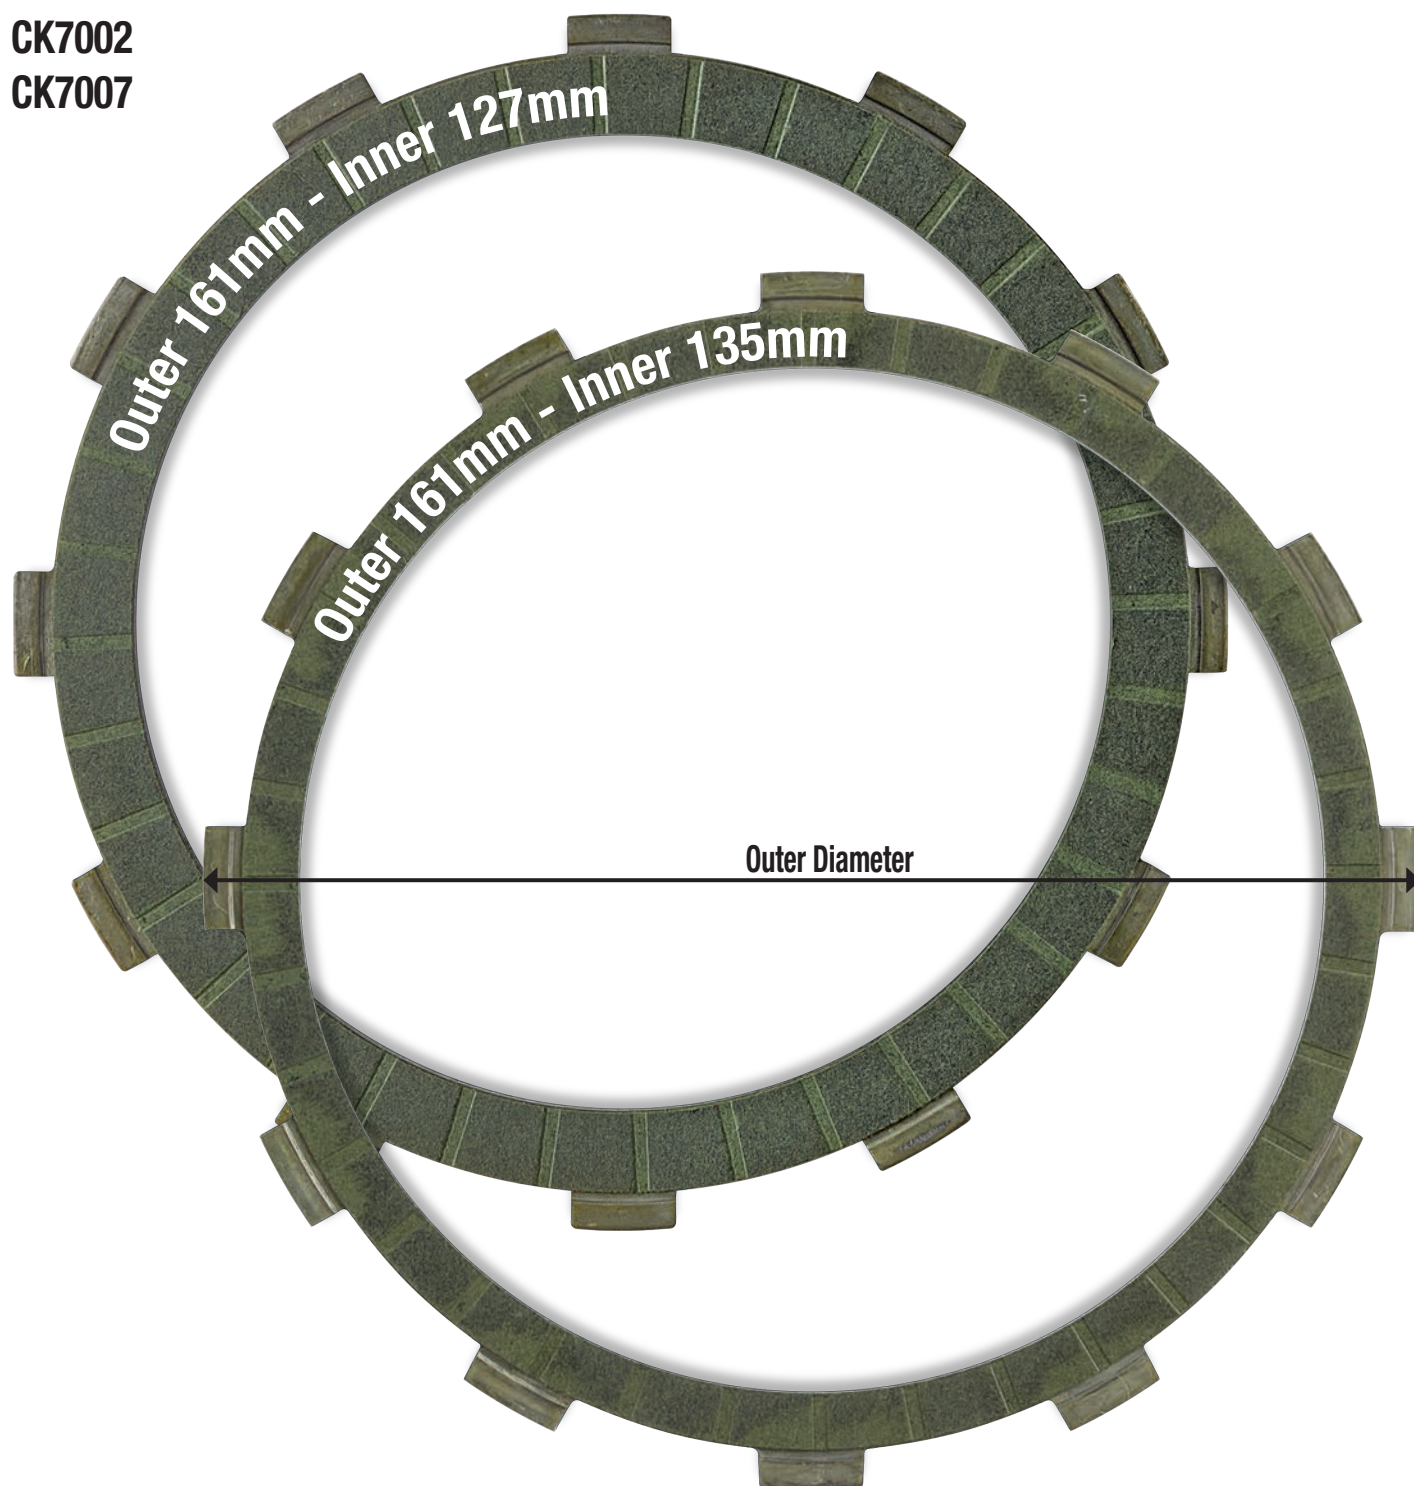

Diaphragm springs are dish shaped flat high carbon heat treated steel pressure rings made in the EBC UK pressworks.

CSK Diaphragm Spring Kit #	Spring Height # mm	Spring Outer Diameter # mm	Spring Inner Diameter # mm	Quantity per pack
CSK913	9.15	132.91	59.98	1

CT CLUTCH REMOVAL TOOLS

Made in the UK, these laser cut clutch removal tools make clutch removal, loosening of the drive shaft bolts and re-tightening a breeze, without any fear of damage to your expensive clutch basket.

Tools can be extended to create more leverage if required with any simple workshop tool or tube. EBC Brakes produce a clutch tool for almost every clutch plate design known.

CAUTION: replacing a clutch kit requires skill, expertise and a good workshop, plus tools. A small press and a spring compressor may be needed. If you are not familiar with these routines, use a competent dealer or visit www.fixmyhog.com as an example of how to guide you safely.

BRAKE PADS AND ROTORS FOR POLARIS SLINGSHOT

EBC BRAKE STANDARD ORGANIC BRAKE PADS

A direct equivalent to the OE brake pads, suitable for every day driving. This is our quietest pad formulation for silent braking – progressive braking with excellent cold friction.

EBC BRAKE YELLOW CODED UPGRADE BRAKE PADS

For faster driving, these pads give excellent cold bite and high temperature fade resistance. Stopping distances are drastically reduced, progressive braking with unparalleled pedal feel.

EBC BRAKE ROTORS – OE QUALITY REPLACEMENT

EBC brake rotors are cast using high quality G3000 alloy making this a premium OE quality replacement brake rotor for your Slingshot. Black thermic coated for aesthetics and corrosion protection.

EBC BRAKE ROTORS – BSD BLADE SERIES

The unique BSD blade slot design removes hot gasses from the heart of the braking zone allowing for quicker and more effective dissipation of heat.

COMPLETE VEHICLE STANDARD BRAKE KIT

This money saving kit includes one set of standard organic brake pads for both the front and rear of your vehicle, plus two OE quality brake rotors for the front and one for the rear.

COMPLETE VEHICLE UPGRADE BRAKE KIT

This upgrade kit includes one set of yellow coded upgrade brake pads for both the front and rear of your vehicle, plus two BSD blade slotted brake rotors for the front and one for the rear.
